## EXPERIENCE

---

**Summer IT Intern** · [Industrial Info Resources](#) May – August 2025

- Resolved front-end, back-end, and database issues in a production system using JSP, Java, Oracle, TypeScript, and Angular.
- Implemented feature requests (sorting, searching, data retrieval) and deployed fixes to production.
- Led modernization of a legacy front-end, building a complete new interface and coordinating feedback with business users.
- Performed code reviews, GitLab branching, and merges alongside senior developers.

**Summer IT Intern** · [Industrial Info Resources](#) June – August 2024

- Analyzed a production codebase to understand system architecture, data flow, and component integration.
- Triaged bugs and enhancement requests, managing issue lifecycles from discovery through deployment.
- Acted as liaison between technical and non-technical stakeholders to align business needs with engineering solutions.

**E-Store Associate — Personal Shopper** · [H-E-B](#) April 2022 – Present

- Fulfill online customer orders accurately and efficiently, meeting time-sensitive delivery requirements.
- Promoted from Curbside Associate; recognized for reliability, accuracy, and consistent performance.

## EDUCATION

---

**B.S. Computer Science** · [University of Houston](#) May 2026

GPA: 3.952 · Summa Cum Laude

Completed full-stack capstone emphasizing collaborative workflows and software best practices.

**Associates of Science** · [Lone Star Community College](#) December 2023

GPA: 4.0 · Summa Cum Laude

## PROJECTS

---

**Cougar Connect** · [React](#) · [Node.js](#) · [Express](#) · [PostgreSQL](#)

- Full-stack volunteer management app where admins create events and match volunteers, with user auth, notifications, and email verification.

**Cougar Depot** · [React](#) · [Node.js](#) · [MySQL](#)

- Simulated postal service system with package tracking, pricing estimates, and admin tools for managing locations and departments.
